

Please indicate your solutions clearly in the document using complete sentences and brief explanations. The point is that you indicate to me what the solution is and how it relates to the context of the question being asked.

Bring your written work with you to class on the due date.

## **Projection Market Share**

Read the case study “Designing a Puzzle” at the end of Chapter 6 in the text and address the four questions that follow. (I think you will find this project easier to handwrite than to typeset.) Clearly label alternatives and steps, including both a description of what you are trying to do at that stage as well as the number of ways to do it. See the sample in the reading for an example of a detailed write up.
